Meghna Chandak

Full Stack Developer | Python & FastAPI
Email: meghnachandak5@gmail.com **Phone:** +91 8446799776
GitHub: github.com/MeghnaChandak **LinkedIn:** linkedin.com/in/meghnachandak/

Professional Summary

Backend-focused Full Stack Developer with 1+ year of experience building production applications using **Python, FastAPI, React.js, MySQL, and Redis**. Experienced in REST APIs, complex business workflows, RBAC, real-time systems, JWT authentication, and Docker, with a strong foundation in DSA and problem solving.

Skills

Languages: Python, JavaScript, SQL **Backend:** FastAPI, REST APIs, WebSockets
Frontend: React.js, Ant Design, HTML5, CSS3, Axios **Databases:** MySQL, PostgreSQL, Redis
Security: JWT, OAuth2, RBAC **Tools:** Git, GitHub, Docker, Postman, VS Code
Concepts: Multi-Tenant Architecture, Database Design, Concurrency Control, API Design

Education

Bachelor of Engineering in Computers – Honors: Data Science, SPPU 2021 – 2024
CGPA: 9.31

Experience

Full Stack Developer - Integrated Active Monitoring, Pune Apr 2025 – Present

- Built and enhanced a production **ERP platform using FastAPI, React.js, MySQL, and Redis**, supporting **500+ users** across **50+ business modules and workflows**.
- Developed REST APIs, CRUD workflows, and business logic covering the complete material lifecycle from **Purchase and Inventory through BOQ, Quotation, PO, Material Request, DC, Installation, Return, QC, OEM, and final stock/discard**.
- Implemented **role- and scope-based access control** with JWT authentication and Redis-backed session/scoping, while supporting workflows for **50+ daily tickets and 100+ field engineers**.
- Introduced end-to-end **site material return tracking**, closing a previously untracked inventory gap and enabling accountability for returned material worth **47.86L+**.
- Built and optimized complex **SQL queries and database workflows**, improving data retrieval and supporting operational reporting across multiple business processes.

Projects

Ledger — Multi-Tenant Lead Tracker — FastAPI, React, PostgreSQL, WebSockets, Stripe, Docker

- Built a B2B SaaS CRM with strict **tenant-level data isolation** and tenant-scoped RBAC for Owner, Admin, and Member roles.
- Integrated **Stripe subscription billing** with signature-verified, idempotent webhooks for reliable subscription lifecycle management.
- Implemented **live pipeline updates via WebSockets** and optimistic locking to prevent lost updates during concurrent edits.
- Built fuzzy **duplicate-lead detection using PostgreSQL trigram similarity** to identify potential duplicate records beyond exact matching.
- Containerized the application with **Docker** and designed the backend around scalable service boundaries for production-style deployment.

Construction Project Management System — Tkinter, SQL Jan 2025

- Designed a relational database schema, CRUD workflows, reporting, and project tracking features.

EmpowerMindSpace — HTML, CSS, JavaScript, MySQL May 2024

- Developed responsive interfaces and database-backed appointment management workflows.

Certifications

Data Structures and Algorithms — CoreCode Programming Academy Masterclass in Python — CoreCode Programming Academy

Leadership & Activities

Vice President — E-Cell Technical Head — Coding Hub National Level Athlete — 4x400 mts Relay
